

HYDROSLIDE

SINGLE-SLIDING SHOWER DOORS WITH A SLEEK MODERN LOOK

The Hydroslide shower door system features the minimal, modern **"all-glass" look** that is becoming increasingly popular with interior designers and homeowners. The Hydroslide system is adaptable to many shower and tub configurations, including corner showers where glass meets glass at 90°. The Hydroslide was the first modern sliding door system to incorporate a **sliding door and a fixed glass panel**. This design finally gave interior designers and homeowners a sliding option with less metal than the bypass sliding systems that used to dominate the market.
